

"Working to deliver services which improve the health and wellbeing of our population and improve job satisfaction for our staff. Hatters Health Network aims to support delivery of high quality, cost effective holistic care to the population we serve, through the sharing of best practice, and by ensuring an equitable approach to enable effective team working"

Leagrave Surgery part of Hatters Health Primary Care Network

We are part of Hatters Health Primary Care Network (PCN) which is a collaborative between 6 Luton GP Practices: Bute House Medical Centre, Dr Mirza & Partners, Leagrave surgery, Lister House Surgery, Oakley Surgery & Sundon Medical Centre.

PCNs are groups of surgeries that work together on initiatives for their combined populations of patients; for example, the delivery of COVID vaccinations. PCNs build on the core of current primary care services and enable greater provision of proactive, personalised, coordinated and more integrated health and social care. Clinicians describe this as a change from reactively providing appointments to proactively care for the people and communities they serve.

Working together as a PCN provides the opportunity to recruit additional professionals including Clinical Pharmacists, Health & Wellbeing Coaches, Social Prescribers, Care Co-ordinators, Physician assistants and Physios. This allows you to access an experienced professional who will be best placed to support you.

It also enables us to provide appointments on Saturdays and from 6.30pm – 8pm on weekdays. These appointments may be delivered from any of our 6 practice sites.

As a PCN Hatters Health also provide a number of educational evenings for patients - details of these are available on our website and you will also receive text message alerts from us.
